Many health and wellbeing problems we see here stem from poor diet, lack of physical activity but also insufficient human touch.

Massage increases circulation, relieves pain, improves immune response, supports your body to reduce inflammation, reduces blood pressure and improves mood.

Physical human touch by a caring therapist has also been shown to improve heart health as it increases oxytocin in circulation. Oxytocin improves your heart's adaptability which we measure through 'heart rate variability' Oxytocin also triggers stem cells to migrate into the heart muscle and repair it.

Massage therapy is not an indulgent luxury, it is one of the best-known therapeutic treatments for the heart.

Massages included as standard in any of our package can be exchanged for others on our treatment lists, and the guest account is adjusted accordingly.

Massages:

Hoogland Signature Heavenly Earth Massage 80 min R 930

The Hoogland Earth Massage has been specifically designed for and is unique to Hoogland. It incorporates the elements of fire (hot stone), earth (wood instruments rolled over the body for a unique experience, air (special infusion of aromas to stimulate a sense of wellbeing and nurturing) & water (rhythmical and continuous movements to mimic the ocean)

Full Body Massage 50 min R 590

This is a completely hands-on treatment of the whole body. The main function is to improve blood and lymph circulation as well as reducing stress and tension in the body. This massage covers the back, neck, legs, arms, stomach and decolté area.

Back and Neck Massage or Indian Head Massage 25 min R 430

The technique used is the same as the full body massage except the therapist focuses on the back and neck area, or back, neck and head, reducing stress and tension in the scalp, head, shoulders and neck.

Deep Tissue Massage 75 min R 845

The purpose of this massage is to get to the deeper-seated muscles. It can be painful. It is a slow deep massage, working on the deeper layers of muscles. This massage is mostly suitable for athletes or people with severe tension. Less Oxytocin is released during this massage as it can be painful.

Aromatherapy Full body 50 min R 615
Back and Neck 25min R 450

Aromatherapy is the use of essential oils from plants for their therapeutic properties and can aid digestion, detoxing, de-stressing, poor circulation and relaxation. It is a flowing massage making use of light, relaxing movements. We make use of pure essential oils that are blended for each specific guest in a carrier oil.

The essential oils take about 1 – 2 hours to be effective, therefore steaming after the treatment is not recommended.

Some oils are not recommended during pregnancy, please consult with the therapist prior to massage.

Gua-Sha Facial Massage 25 min R 420

Gua sha is a long-used technique originally practiced in Traditional Chinese Medicine. It uses smooth cold stones, to massage the face with both short and long strokes and varying amounts of pressure for detoxification, lymphatic drainage, and also pain relief.

Hot Stone Massage Full body 80 min R 875
Back and Neck 45min R 540

Hot stone massage is a specialty massage where the therapist uses smooth, heated stones as an extension of their own hands, or by placing them on the body. The heat can be both deeply relaxing and help warm up tight muscles so the therapist can work more deeply, more quickly.

Reflexology 40 min R 535

This holistic therapy uses the feet as a map of the whole body. By manipulating, and applying pressure to certain parts of the feet, the whole body can be 're-tuned' and brought back into balance. It relieves stress and tension, improves circulation thus increasing the efficiency of all organs and cells.
